# EAM'S UNIVERSAL VEST - FLEXIBILITY AND COMFORT

### EXCEPTIONAL SAFETY

EAM's Universal Vest is designed with an open area collar to be placed over the head and onto the neck and shoulder area, so that the vest rests on the chest of the wearer over 35 lbs. The vest is secured to the wearer using a harness strap. Inflation is accomplished by either CO<sub>2</sub> or oral inflation. Each vest is equipped with a light system assembly.

The AIC-35 life preserver is also designed for use on infants and small children weighing under 35 lbs.

### ABOUT INFANT USE

The AIC-35 is a universal vest because of its ability to extend life saving capabilities to infants. The life vest has been outfitted with an additional buckle, snap strap and adjustable snaps to enable the vest's transition for infant use.

An infant is placed into the preserver by passing the necessary strap through the infant's legs, around the back and over the left shoulder. The buckle secures the infant. The snap strap is a secondary means of security.

### AIC - 35 FEATURES:

- Single cell
- Flame retardant urethane coated nylon
- RF heat sealed seams
- Manual CO<sub>2</sub> inflator and an oral inflation tube
- Available for passengers and crew
- Whistle optional
- 10 Yr. and 5 Yr. frequencies of inspection
- All vests include RFID Tag

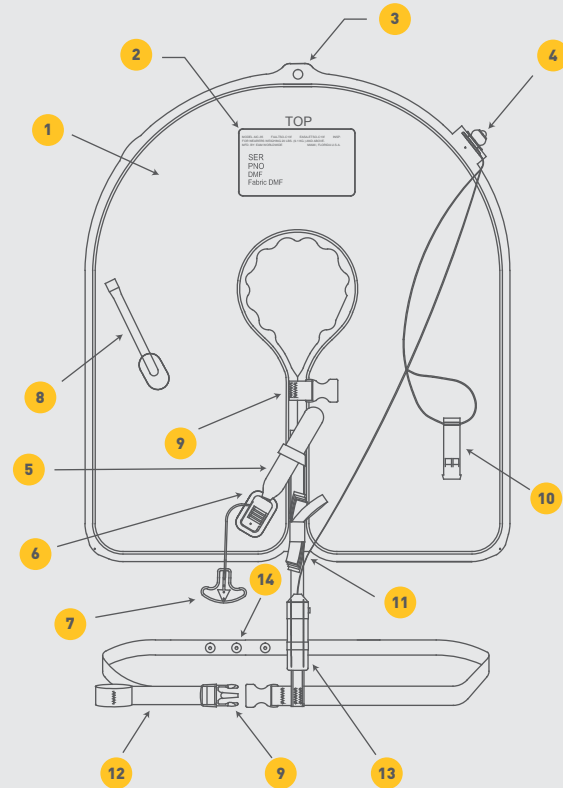

MADE IN THE USA
