COMMERCIAL**AVIATION****EVACUATION SLIDE SPECIFICATIONS AND DRAWINGS**

The EAM Model ES-320F evacuation slide is designed to provide rapid egress from the aircraft in case of emergency. The escape slide assembly consists of an inflatable slide assembly with Radiant Heat Resistant fabric, a compressed gas cylinder and valve inflation assembly (which includes an air aspirator), a composite packboard, and a composite decorative hard cover which protects the escape slide assembly while installed on aircraft.

EAM Model ES-320F Escape Slide is designed and tested to meet FAA TSO-C69c. Approved by FAA TSO-C69c. The evacuation slide enhances EAM's inflatable product portfolio, giving our clients greater selection than ever before.

Please call our offices or visit eamworldwide.com for more detailed information.

A LEGACY OF DEDICATION

EAM Worldwide was founded by Samuel Oroshnik, who was an aviation enthusiast since his teenage years. He took his passion for flying and turned it into a business to serve the unmet needs of the aviation industry. As a one-man shop, Oroshnik began by selling surplus safety equipment and later designed and built his own life rafts and vests by hand.

Today, EAM serves all OEM's, operators and lessors in the aviation and marine industries worldwide. Celebrating over 60 years as an industry leader, EAM continues to offer lightweight, innovative products which are customizable to meet clients' specific needs. Our dedicated team of specialized engineers continues to discover and design new applications in safety and survival technology year after year. EAM is also proud to support over 30 distribution centers and repair stations to ensure the optimal maintenance and performance of its products. EAM Worldwide proudly serves clients around the world with its headquarters in Miami, Florida and global sales office in Dubai, United Arab Emirates.

SLIDE PRODUCTS

EAM slides carry the same service guarantee and attention to detail as our vest and raft products. EAM's slide series is also equipped with new features, such as new generation white LED lights to ensure visibility during day or night use. All EAM slides are designed to provide safe, rapid and reliable means for deplaning in case of emergency.
